

END OF SEMESTER REPORT ON ACTIVITIES IN THE WEBSITE SUBSECTION BY THE WEBSITE HEAD ON THE 4TH OF JUNE, 2022.

Introduction

This report is presented to you Agbodjive Eterna Kofi, the current website subsection head. By the grace of God, we have to a successful semester and in this report I shall present an account of all that went on during the semester. This report contains updates on the members, subsections meeting and finally a touch on the technical aspect of the subsection.

Members

The current membership of the website subsection amounts to about 19 with about 9 of them being active. The rest would promise to come to meeting and end up not showing up or would call to give excuses for not coming or they are very far from the church basement.

Subsection Meetings

It was my mission, taking into consideration suggestions from my predecessor, to introduce my subsection members to most basic web markup languages such as HTML and CSS and if possible introduce them to a backend framework. I decided to take this route because HTML is the basis of WordPress which was used to church's website. In addition to that, I aimed at guiding members of the website subsection build something tangible they can refer to as the product of their time spent at subsection meeting which I believe I am achieving. The active members are embraced the opportunity and that made activities of the subsection for the semester successful.

Technical Aspect

Generally, our engagement on the social platforms has been effective especially on Facebook and Instagram. The updates of word power on the church's website during the semester has not been constant due to network related issues. It would have been better if we had a weekly scheduling of the updates of word power on the church website, but I am currently relying on the help of a member who have a better network situation at her hostel to the update.

Conclusion

To conclude, I would say the semester was a fruitful one even though things did not go as planned. I hope to make some improvement on updating of word power, the number of members in my subsection and other important issues.
